

Tutorial Sheet - Artificial Intelligence

Faculty/School	ICT FACULTY
Course Code/Title	CSC 4121/Artificial Intelligence
Instructor	Dr FOTSING KUETCHE
Rank	Lecturer
E-mail address	Fotsing.fk@gmail.com

1 Introduction

1. Define *Artificial Intelligence* in your own words.
2. Differentiate between *Artificial General Intelligence (AGI)* and *Artificial Superintelligence (ASI)*.
3. List three historical events that marked the evolution of AI.
4. Explain the difference between *symbolic AI* and *connectionist AI*.
6. Name at least five major subfields of Artificial Intelligence.
7. Describe how AI can be applied in **education**, **healthcare**, and **transportation**.
8. Identify which of the following are AI applications and justify your answer:
 - Voice assistants like Siri
 - Spreadsheets performing formulas
 - Spam email filters
 - Search engines like Google
9. Given a problem such as “finding the shortest route between two cities,” classify it according to AI problem types (searching, optimization, classification, etc.) and explain your reasoning.
10. Explain why data is called the “fuel” of AI.
11. Match each AI subfield with a correct example:

Subfield	Example
Computer Vision	_____
Natural Language Processing	_____
Expert Systems	_____
Robotics	_____
Machine Learning	_____
